### PREPARATION

The next morning, the dough shall quadruple its initial volume and shall be slightly curved.

Add DOLCE FORNO to the first dough and knead for 5-10 minutes.

When well-combined, add sugar, honey, salt and 1 kg of egg yolk. Knead for 10 minutes, then add the remaining egg yolk in two times.

Add the softened butter to the dough in 4 times.

Add the chocolate ganache in 3 times.

Lastly add RENO CONCERTO LACTEE CARAMEL/TUTTAFRUTTA ALBICOCCA PELLECCHIELLA

Let the dough rest in the proofer room at 28-30°C for about 60-70 minutes.

Divide the dough into portions of 1100g and roll each portion up into a ball shape.

Move onto boards or trays and leave to rest for another 30 minutes.

Roll them up tight again and transfer into the specific paper moulds (specific for 1kg veneziana).

Put in the proofer room at 28-30°C with relative humidity of about 70% until the top of the dough nearly leans out of the edge of the mould; if the proofer room is devoid of humidifier, cover the dough with plastic sheets.

At the end of the rising, leave the veneziana exposed to the air for 20 minutes until a light film forms over the surface.

Cut the surface of the veneziana forming a cross and place a small piece of cold butter in the

middle of it.

Bake at 160-180°C, until the temperature of the center reaches 94-95°C.

As soon as they are removed from the oven, the veneziana should be placed onto the specific toothed racks and left to cool upside down for 8-10 hours at least.

**ADVICE:**
